

Modular Belt Spooling System

The compact Modular Belt Spooling System is the perfect companion to your Hamill APS Tabletop or Standard Harvester. With its unique and simple design, it makes removing and replacing the conveyor belt during daily cleaning a breeze. The adjustable alignment tray and special locking features gives you a smooth belt transition to and from your Harvester. All the while preventing the belt from touching the ground and running the risk of being damaged through manual handling. The Modular Belt Spooling System is will simplify your cleaning process, belt alignment, and increase the your equipment's life span.
